Introduction .....	2
Methodology .....	3
Results .....	5
Discussion & Conclusions .....	6

### Appendices

- Appendix 1: Environmental Dust, Laboratory Results
- Appendix 2: Dust Monitoring Calculations

### Figures

- Figure 1: Dust Monitoring Locations

## Executive Summary

1. Murphy Environmental (a division of Murphy Concrete Manufacturing Ltd.) holds an inert waste licence for the purpose of restoring a quarry to its original condition and integrating it into the surrounding landscape. The site is located at Hollywood Great, Nag's Head, The Naul, Co. Dublin.
2. The facility is licensed by the Environmental Protection Agency (EPA) and operates under Waste Licence W0129-01. The licensee (Murphy Environmental) manages and operates the facility to ensure that the activities do not cause environmental pollution. Murphy Environmental is required to carry out quarterly dust monitoring and submit all monitoring results to the EPA.
3. Dust monitoring measures the level of airborne dust in and around the site, which may be generated by landfill activities and quarrying, traffic movements and other dust-generating activities around the site.
4. Dust deposition is monitored at four locations within or around the site on a quarterly basis. Dust monitoring for Quarter 1, 2008 was conducted between the 10<sup>th</sup> of January and 11<sup>th</sup> of February 2008.
5. Dust monitoring results at all monitoring locations were below the licence limit for dust set in Waste Licence W0129-01.
